SUMMARY

Software Engineer with 5+ years of experience building scalable, high-performance web applications. Expertise in modern front-end architecture and AI-assisted development, with a track record of leading cross-functional teams of 6+ developers. Skilled at translating complex requirements into robust technical solutions, intuitive user experiences, and maintainable products.

PROFESSIONAL EXPERIENCE

Tatvasoft - Technical Lead **Nov 2021 - Aug 2025**

- Collaborated with clients to translate business requirements into scalable solutions, leveraging AI assisted workflows to accelerate delivery across five projects.
- Strengthened code quality through engineering best practices, reducing complexity and addressing security vulnerabilities.
- Led 6+ developers across project execution, providing technical direction, mentoring, and leveraging AI tools to improve development productivity.
- Developed and delivered technical training for junior developers, incorporating modern AI-assisted development practices.

o2h Technology - Software Developer **Jan 2020 - Nov 2021**

- Worked on a variety of projects, including 3 in-house projects and 5 client projects.
- Implemented core feature workflows using advanced JavaScript, React, and Angular, ensuring scalable state management and modular UI components.
- Developed cross-browser/platform applications that met the needs of users on all devices, ensuring that the applications were accessible and user-friendly.
- Improved website load times and performance by using webpack.

EDUCATION

B.Tech. in Computer Engineering - 8.79 CGPA **2016 - 2020**
SAL Institute Of Technologies And Engineering Research

SKILLS

- **Technologies**: React, Next.js, Angular, TypeScript, JavaScript, Redux, React Query, HTML5, CSS3, Node.js, Express.js, ASP.NET Core, C#, REST APIs, GraphQL, SQL, MongoDB
- **Tools:** Git, GitLab, Bitbucket, Jira, Agile/Scrum, Code Reviews
- **Testing & Quality**: Jest, Unit Testing, Integration Testing, Cross-Browser Testing, Debugging, SonarQube, Code Quality, Security & Vulnerability Remediation
- **Performance & Web**: Webpack, Web Performance Optimization, SEO, WCAG, Accessibility
- **Styling**: Tailwind CSS, AntD, Semantic design, CSS-SASS Modules, Styled Components.
- **AI-Assisted Development:** AI-assisted coding, code analysis, debugging, documentation, developer productivity workflows
